Standard of Practice for Recommending Non-Scheduled Substances

In your own words, describe your understanding of the intent of the Standard of Practice for Recommending Non-Scheduled Substances.

What, if any, changes do you feel you can make to your record keeping habits and patient care to better meet the Standard of Practice for Recommending Non-Scheduled Substances?

Scenario: Dr. A. Shirley ND has a new patient who has been seeing another naturopath who has moved away, and they have not had a naturopathic visit for 4 months. The patient continues to take all the natural health products their former naturopath recommended. What steps should Dr. A. Shirley ND take, considering they are already taking natural health products?
