

## DUAL REGISTRATION

### Intent

To advise Registrants with respect to holding a certificate of registration with another health regulatory College in Ontario.

### Definitions

Dual Registrant: A Registrant of the College of Naturopaths of Ontario who is also a current member of any other health regulatory College in Ontario.

### STANDARD 1

*The Registrant ensures that their practice is managed such that patients, the public, the College, other health care professionals, and other relevant authorities understand when the services provided and billed for are naturopathic services.*

A Registrant demonstrates the standard by:

- ensuring that the practice appointment book and billing records clearly distinguish naturopathic services,
- maintaining a complete separate patient chart recording all information pertaining to naturopathic services and/or ensuring that the electronic records system provides a means of accessing the record of patients pertaining only to naturopathic services,
- scheduling a patient visit for naturopathic services, at which time only naturopathic services are provided, and
- ensuring that the patient knows beforehand what type of professional care they will be receiving.
