## Naturopathic Refresher Program Guideline

Section 6(2)(a) and 6.1(2)(a) of the Registration Regulation sets out that NDs in the General and Emergency classes of registration may address currency deficiency by successfully completing a refresher program approved by the Registration Committee. The following information has been prepared to help guide NDs in selecting and proposing appropriate refresher training (i.e., a “refresher program”) to the Registration Committee for review and approval.

Proposed refresher program training must be submitted via the [Refresher Program Submission form](#). Submissions which do not meet the general criteria, or are incomplete, will not be accepted for referral to the Registration Committee for review.

### General Criteria

#### **Proposed Refresher Programs Must:**

- Be completed prior to the expiry date of your certificate of registration (i.e., March 31 unless registered in the Emergency class with a different certificate expiry date).
- Align with the core competencies and standards of practice of the profession and fall within the scope of practice of the profession (see **Naturopathic Refresher Program Content Areas** chart).
- Meet ‘refresher course’ criteria as noted in the Registration Policy, i.e., courses must be offered by a recognized University or College, offered by a CNME-accredited program or have been approved by/meet the approval criteria of the Quality Assurance Committee of the College for **Category A** Continuing Education credits under the Quality Assurance Program.
- Be sufficiently robust (see **Assessment of Program Robustness** chart) in addressing your level of currency deficiency.

#### **Proposed Refresher Programs Cannot:**

- Include previously completed courses (e.g., courses completed for meeting Continuing Education requirements)
- Include online courses for refreshing practical skill (all practical skill refresher training must be completed in person)
